

# Integrating the SDGs in Comprehensive Internationalization Strategies

*Approaches for Research, Teaching and Engaging Communities*

AIEA Thematic Forum | University of California, Davis | April 11-12, 2024

This Thematic Forum will provide a unique space for universities to discuss the exciting opportunities to integrate the UN Sustainable Development Goals (SDGs) in ways that strengthen the university mission and impact. The forum will address the strategic-level issue of how to integrate the 2030 Agenda through university internationalization efforts, specifically through research, teaching and engagement with communities. The forum will feature leaders who are championing novel approaches from UC Davis, other universities and the local community.

## Benefits to participants

- Creation of a community of practice among participant SIOs and international offices working to advance the SDGs through research, teaching and community engagement.
- Identification of an initial network of potential on-campus partners and community partners for SIOs and international offices to collaboratively advance the SDGs.
- Construction of a draft strategy focused on research, teaching or engaging communities that promotes the integration of the SDGs into advancing internationalization. Participants will identify action steps to take back to their home campuses.

## More Information

**Jolynn Shoemaker**, Director of Global Engagements, Global Affairs
